EDUCATION

National Yang Ming Chiao Tung University

February, 2021 - present Advised by Prof. Wei-Chen Chiu

Master in Computer Science and Engineering Expected graduation date: August, 2023

National Chung Cheng University

September, 2017 - January, 2021

Bachelor in Computer Science and Information Engineering

Overall GPA: 4.18 / 4.3 Major GPA: 4.21 / 4.3Ranking: 1 / 43

Research EXPERIENCE **National Chung Cheng University**

March, 2020 - January 2021

Machine Vision and Learning Lab

Undergraduate Ressearch Assistant

Advised by Chen-Kuo Chiana

• Published one CVPR Workshop paper

• College Student Research Project: AI calligraphy using 6DoF robotic arm

Honors and SCHOLARSHIPS Presidential Honor Award

2017 - 2021

Achieve top 1% in College of Engineering for 5 times

National Chung Cheng University

College Student Research Scholarship

2020

NT\$ 48,000

Ministry of Science and Technology, Taiwan

Google Student Travel Scholarship

2019

Scholarship to attend 2019 Grace Hopper Celebration

Google, Taiwan

PUBLICATIONS

Yun-Lun Li, Zhi-Yi Chin, Ming-Ching Chang, Chen-Kuo Chiang. Multi-Camera Tracking by Candidate Intersection Ratio Tracklet Matching, Accepted by Proceedings of the IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR) Workshop 2021

PROJECTS

Lane Detection - Computer Vision

June, 2021

- Design 3 methods for lane detection (2 traditional computer vision method and 1 deep learning method).
- Introduce hourglass network into the deep learning method and achieve accuracy 97% in TuSimple dataset.
- Realized the importance of data augmentations to boost the the accuracy.

Reimplementation Challenge - Reinforcement Learning

July, 2021

- Reimplement ICLR 2018 paper: MAXIMUM A POSTERIORI POLICY OPTIMISATION in Pytorch.
- Successfully replicate the results in Cartpole, Hopper and Acrobot in MuJoCo environment

Mango Classification - AICUP Competition

June, 2020

- Implement numerous classification model using Pytorch.
- Achieve accuracy 82.32% which place No.8 in the public leaderboard and No.12 in the private leaderboard.
- Embedded the best model into Raspberry Pi 3 by pruning the model until it can run on Raspberry Pi 3.

Face Morphing and Warping - Introduction to Multimedia Technology

January, 2020

- Implement face morphing and warping gradually for person A to person B using MATLAB.
- Visualize the results by making it into short video.

Google CodeU Calendar Helper - Google

August, 2019

- A multifunctional Webapp for to-do lists and calendars.
- Using Javascript and JQuery as front-end and Java as back-end and host the Webapp on Google cloud console.
- Highlights: tagging system, nice dashboard design, synchronize with Google Calendar.

SKILLS

Programming Languages and Frameworks

- Programming Languages: Python/C++/C/MATLAB/LATEX/Java/Javascript
- Machine Learning: Pytorch/OpenCV/scikit-learn
- Dev Tools: Git/Jupyter/Vim/VS Code/ Google Cloud Platform/ PyCharm/IntelliJ IDEA

Languages

- Mandarin Chinese (native)
- English (proficient)
